Education

Northwest Missouri State University, **Maryville, MO, USA**
M.S. in Applied Computer Science, GPA: 3.9 *2022 – 2023*

Mahatma Gandhi Institute of Technology, **Hyderabad, India**
B.Tech in Electrical and Electronics Engineering, GPA: 3.0 *2018 – 2022*

Work Experience

Pittsburg National Corportion(Contract) **Hyderabad, India**
Software Engineer **Oct 2025 – present**

- Developed and optimized a centralized orchestration service for Business Banking Demand Deposit Account (BBDDA) opening, handling end-to-end workflows including application submission, fraud validation, account creation, and card issuance.
- Implemented integration with New Account Fraud (NAF) service, replacing legacy DMS providers (Sentilink, LexisNexis, Neustar, Experian) to reduce system dependencies and improve fraud check performance.
- Built and deployed full-stack features using Angular (Harmony framework) and Spring Boot (Micron), including UI enhancements, error handling, and backend service development for real-time account opening (RTAO) and standard (BAU) workflows.

Institute for Development and Research in Banking Technology (IDRBT) **Hyderabad, India**
Research Associate **May 2025 – Oct 2025**

- Developed and integrated a centralized payment processing system for multiple enterprise applications using **Java, Angular,Spring Boot, Oracle, and PostgreSQL**, enabling secure handling of **100K+** transactions monthly with **99.9% uptime**.
- Built full-stack solutions including a lightweight **React.js** intermediary app that reduced client–gateway request latency by **30%**, and delivered responsive, secure web platforms **(IDRBT, Certifying Authority, Digital Walk-in Services, Domain Registry)** that improved user engagement by **40%**.
- Optimized performance and scalability by implementing **JPA repositories** and **JDBC drivers**, cutting query response times by **25%**, and deploying on the **Nutanix private cloud** to ensure high availability, reliability, and compliance with security standards.

Johnson & Johnson(Contract) **New Jersey, USA**
UI Developer **Jun 2024 – Apr 2025**

- Engineered modular and scalable **React.js** applications, including a **chatbot** integrated with **REST APIs**, improving navigation efficiency by **25%**.
- Developed role-based prompt mechanisms reducing operational errors by **25%** and boosting user satisfaction by **20%**.
- Optimized performance and code reusability using **TypeScript, Node.js, and React Material-UI**, ensuring cross-platform compatibility.
- Leveraged **AWS (S3, Lambda, API Gateway)** for cloud deployments and **Jenkins for CI/CD automation**, ensuring reliable system rollouts.

FoodSupply-AI **California, USA**
Software Developer **Dec 2022 – May 2024**

- Delivered a **Supply Chain Management Platform** using **Java Spring Boot (backend)**, **Next.js**, and **Tailwind CSS (frontend)**, reducing operational bottlenecks by **30%** and improving processing speeds by **50%** through optimized real-time database queries.
- Championed **UI/UX testing strategies**, achieving a **10%** reduction in inventory and order discrepancies, while ensuring an optimal and consistent user experience.
- Collaborated with **cross-functional teams** to design and implement new features, optimize existing code, and ensure **scalability, security, and performance** in line with industry best practices.

Verzeo Edutech **Hyderabad, India**
Machine Learning Intern **Sep 2020 – Mar 2021**

- Optimized predictive models for gender classification, improving accuracy by **20%** using python **TensorFlow and Scikit-learn**.
- Automated ETL pipelines reducing data preprocessing runtimes by **25%**, improving system reliability.

Projects

- **Supermarket Sales:** Built ML models to forecast profit margins with **15%** higher accuracy using regression, classification, and clustering algorithms.
- **Video Tutorial:** Developed a CRUD-based video management web app **(React.js, Node.js, MongoDB, Express.js)**, reducing admin tasks by **20%**.
- **Git Analyzer:** Built a **GitHub** replica analyzing repositories with **D3.js**, improving code quality by **20%** and collaboration by **25%**.

Technical Skills

- **Programming Languages:** Java, JavaScript, TypeScript, Python, C, SQL
- **Backend & Frameworks:** Spring Boot, Spring MVC, Spring Security, JPA, JDBC, REST APIs, Node.js, Express.js, Micron
- **Frontend Development:** Angular, React.js, Next.js, HTML5, CSS3, D3.js, Harmony
- **Cloud & Infrastructure:** AWS (EC2, S3, Lambda, API Gateway, DynamoDB, RDS, CloudFront, ElastiCache, etc), Nutanix(Private Cloud)
- **Databases & Messaging:** Oracle, PostgreSQL, MySQL, MongoDB, Kafka
- **DevOps, Security & Development Tools:** Git, GitLab, Jenkins, Terraform, HashiCorp Vault, CyberArk, SonarQube, Postman, Swagger, Archer, Contrast, Azure DevOps for CI and CD.
- **Monitoring, Logging & Analytics:** Dynatrace, LogScale, OCP, Glassbox, Tableau, Power BI, Jupyter
- **UI/UX & Low code Development platform:** Figma, Adobe Photoshop, Canva, Oracle APEX, AEM
- **AI/ML:** Generative AI, LangChain, OpenAI, Hugging Face, Streamlit, NLP, Pandas, NumPy, TensorFlow, Scikit-learn

Certifications

- Google Data Analytics Professional Certification
- Secure Software Development Lifecycle (C-DAC Professional Certification)
- Hackathon Certification for AI
